☐ XSS

☐ CSRF

☒ Feature bug

☐ Other:

Steps to reproduce

*

Describe the steps to reproduce the vulnerability.

The log in page has a reset password button. When I click on it, it tries to take me to the reset page, but for some reason it redirects back to the login page. Thus, to reset the password

because I have forgotten it, I would have to log in first, which as I don't remember my password, I cannot do!

Proof of concept

*

Provide a proof of concept for the vulnerability.

Impact

*

Describe the impact of the vulnerability. How bad is it?

A user who has forgotten his password will paradoxically have to log in to reset his password, due to a bug in the reset page

Screenshots/attachments

Provide screenshots or other attachments to help explain the vulnerability.
