Thanks for filling out [Report issue - Group 32](#)

Here's what was received.

Report issue - Group 32

Please fill out this form to report an issue/vulnerability in the group 32.

Your email (utkarsh20143@iiitd.ac.in) was recorded when you submitted this form.

Vulnerability type

*

Select the type of vulnerability, or specify a custom one.

☐ XSS

☐ CSRF

☐ Feature bug

☒ Other: DOS

Steps to reproduce

*

Describe the steps to reproduce the vulnerability.

The website is hosted on a Apache server. These websites are susceptible to Slow Loris DOS attack, and there have been no further steps taken by the programmers to mitigate this attack

Proof of concept

*

Provide a proof of concept for the vulnerability.

I have ran a script to run a Slow Loris attack. This attack tries to keep many connections to the target web server open and hold them open as long as possible.

This has brought the website down and is unusable as long as I keep the attack running.

Impact

*

Describe the impact of the vulnerability. How bad is it?

Severe; the website is easily DOSable, which means that this website can be brought down whenever an attacker wants.

Screenshots/attachments

Provide screenshots or other attachments to help explain the vulnerability.

CSRF

☒

Feature bug

☐

Other:

Steps to reproduce

*

Describe the steps to reproduce the vulnerability.

After logging into the patient page, we can see that there is very minimal functionality. There is only a functionality to upload documents, and a functionality to pay medical bills. The functionality for searching for doctors, hospitals, etc is missing, and so are the functionalities to book appointments, buy medicines, etc

Proof of concept

*

Provide a proof of concept for the vulnerability.

-

Impact

*

Describe the impact of the vulnerability. How bad is it?

High; multiple essential functionalities of the website are missing

Screenshots/attachments

Provide screenshots or other attachments to help explain the vulnerability.
